Work experience

Senior Development Engineer 2 (React Native)

MPL (Striker.club), Bangalore – (June 23 - current)

I recently joined **Striker**, a digital sports gaming platform that enables users to create fantasy teams, participate in contests, and have the opportunity to win cash prizes. In my current role, I am actively involved in the development of both the Striker website and the Striker app.

The Striker website is built using Next.js and powered by a CMS platform, while the Striker app is developed entirely in React Native. My current focus is on refactoring the codebase to enhance maintainability and scalability, as well as implementing performance improvements to ensure a smooth user experience.

Tech Stack - React, React-Native, NextJs, Typescript

Senior Software Engineer 1

Makemytrip / Goibibo, Gurgaon – (Aug 21 - June 2)

As a part of postsales engineering team at MakeMyTrip/Goibibo, I have worked on all the platforms (App/Web app/PWA) for both brands (MakeMyTrip/Goibibo). Received **super starter award** in Q3 of 2021-22. Makemytrip is one of the largest OTA in India. The makemytrip app/website has monthly 50M visits and Goibibo has around 19M.

- Successfully implemented various optimization tasks in the React Desktop app, including Dockerization, Nginx config migration, webpack migration, and sourceMap file upload automation for better debugging.
- Build internal logging react app from scratch which show customer journey logs and logs on all API levels. This is used internally by engineering teams leadership team.
- Developed a custom routing solution in the React-Native-Web app to enhance user experience and implemented customizable theming for different type of user profile.
- Contributed to the development of key features and components in both React Native and React app, such as caching middleware, last-minute cancellation flow, and many common features for other developers to use, while actively participating in code reviews, bug fixing, and collaborating with stakeholders for timely project delivery.

Tech stack - React Native, React, React-Native-Web, Typescript

Software Engineer

GeekyAnts Software Pvt Ltd, Bangalore - (Sept 19 - Aug 21)

With GeekyAnts I got opportunity to contribute to the development of diverse projects for different clients, including a Bike rental and Car pool App, a Video calling app, a Utility Service Provider Mobile Application and a Supplier portal for an electric vehicle automaker.

- In the Bike rental and Car pool App, contributed by doing enhancement in payment module, onboarding flows, and user profile screens, utilizing a combination of Native Android and React-Native technologies.
- In the Video calling app, collaborated with the team to build a platform for mental health discussions, leveraging technologies such as Twilio SDK, Firebase, and React-Native with Redux.
- In the Utility Service Provider Mobile Application, contributed to the development of an iOS/Android app for managing service accounts, using React Native CLI and state management using Redux and Redux-Saga. Also used a react-native-rename with few changes by forking the library.
- In the Supplier portal for the electric vehicle automaker, designed and developed core components and worked on order & transportation management features using technologies like ReactJS, Redux, Reselect, AWS, GraphQL, MaterialUI, and React-virtualised.

Software Engineer Trainee

CauseCode Technologies Pvt Ltd, Pune – (Jun 19 - Sept 19)

CauseCode was my job & I was hired as a trainee, so got many things to learn beyond technicals.

- Worked on migrating React-Redux project to React-GraphQL, Setup Storybooks for the project. Worked with backend team and developed frontend using data model.

Education

Bachelor of Engineering in Information Technology

Government College of Engineering- May 2019 | Aurangabad, Maharashtra

CGPA- 6.2
